### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The prior art of record do not anticipate nor do they reasonably suggest the tip for demolition and construction; insert; equipment, and method as claimed in claims 1, 13, 16, 17 and 18. The closest prior art, Hrusch (US 5,894,666), cutting and piercing tip comprising many of the claimed elements but lacks the base (20) having a recess and the insert (e.g. 62) having a profile that conforms to the recess contour. Note e.g. clause (d) of claim 1. Another closely related prior art, Ramun '958 teaches a base (e.g. 34) having a recess contour (Fig. 2) and a cutting insert (40) having a profile (e.g. 68) that conforms to the recess contour which provides a safer and inherently a more enhanced connection between the insert and the base. Note e.g. c. 6, ll. 65-66 of Ramun '958. However, based upon the arguments, the Examiner concedes that modification of Hrusch with the teachings of Ramun '958 would not have been obvious. The triangular tip (62, 64) in Harusch is able to utilize both sides of the tip to demolish materials, and modify the same to include a profile would eliminate the utility of one of the two sides. Moreover, none of the other prior art of record fairly teach or suggest this lacking feature or step. The above applies to both the method and apparatus claims. Thus, it is believed that the claimed invention with the lacking features and method steps are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
